

□ Assessment grid

Here is the assessment grid that will be used for the peer review as well as the final review with your tutor.

Don't hesitate to use it as you make progress on your project, to make sure you're going in the right direction!

Competencies	□ Acquired
Create and animate web pages with HTML5 and CSS3 1/2 (Bring a model to life)	<p>HTML5 and CSS3 have been properly implemented:</p> <ul style="list-style-type: none"> <input type="checkbox"/> The tags used are HTML5 compliant. <input type="checkbox"/> The pages do not return any errors <input type="checkbox"/> There is no inline CSS in the HTML code, all the CSS code is in application.css <input type="checkbox"/> Classes are used for repeated styles <input type="checkbox"/> Unique selectors (id, combined selector...) are used to apply unique styles. <p>The implementation of the mock-ups is complete:</p> <ul style="list-style-type: none"> <input type="checkbox"/> All the elements of the model are present in the pages. <input type="checkbox"/> All elements are correctly stylized (no major differences with the models). <input type="checkbox"/> Navigation links are active. <p>Code quality :</p> <ul style="list-style-type: none"> <input type="checkbox"/> The whole code is clean (example: Indentation) and readable. <input type="checkbox"/> The names given to classes and ids are expressive.
Make the interface responsive (desktop, tablet, mobile)	<ul style="list-style-type: none"> <input type="checkbox"/> The learner has used CSS3 Media Queries. <p>The interface is responsive:</p> <ul style="list-style-type: none"> <input type="checkbox"/> The pages look presentable on desktop <input type="checkbox"/> The pages look presentable on tablet <input type="checkbox"/> The pages look presentable on mobile <p>The responsive interface is neatly rendered:</p> <ul style="list-style-type: none"> <input type="checkbox"/> All requested elements are there on mobile, tablet and desktop. <input type="checkbox"/> There is no overflow of text, images, etc. on mobile, tablet and desktop. <input type="checkbox"/> The reading experience is comfortable (without having to zoom in or take any other actions) on mobile, tablet and desktop.
Respect web standards (W3C)	<p>□ Each HTML file passes the validator available at http://validator.w3.org/#validate_by_upload"}</p> <p>□ Each HTML page contains the following tags: html, head, body, title.</p> <ul style="list-style-type: none"> <input type="checkbox"/> Each HTML page has a DOCTYPE tag <input type="checkbox"/> Images have an "alt" tag (accessibility) <input type="checkbox"/> All tags are closed (/>) <p>□ Each HTML file passes the validator available at http://validator.w3.org/#validate_by_upload</p>
Apply SEO principles in the code	<ul style="list-style-type: none"> <input type="checkbox"/> Semantic markup is respected <input type="checkbox"/> Each block of text is enclosed in a p tag <input type="checkbox"/> The menu is enclosed in a nav tag, itself enclosed in a header tag <input type="checkbox"/> There is a header, one or more sections, and a footer. <input type="checkbox"/> The hierarchy of titles is respected (one H1 per page, then H2, H3 ...) <input type="checkbox"/> Images have an "alt" tag consistent with their content <input type="checkbox"/> Each page has a title tag <input type="checkbox"/> Each page has a meta description tag
